EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Diana DiBerardino on 12/7/07.

The application has been amended as follows:

In Claim 25 after "surface" on line 7 insert --- wherein the second end of the appendage at least partly directly contacts the horizontal supporting surface to at least partly support the body ---.

2. The following is an examiner's statement of reasons for allowance: The prior art failed to show a toy having a body that can directly contact a horizontal support surface and an appendage having a surface that also partly contacts the horizontal support surface and configured to move along a non-circular path without advancing the body along the horizontal supporting surface. The prior art also failed to show the appendage rotating relative to the body about a first axis while a tail device rotates relative to the body about a second axis that is perpendicular to the first.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
